

# Brisq2GO – a SmartMove

## For Your Brisque

BRISQ2GO is a Windows based addition to your Brisque workflow to give you a broad set of new features and benefits. Brisq2Go upgrades your Brisque to a full PDF Workflow.

No additional software is required on the Brisque or the Macintosh/PREPS front end

### ➤ "Raster" Capability

- Low res soft proof file in either raster PDF or JPEG format
- Send Brisque jobs to colour proofing systems of your choice
- Standard TIFF at user selectable resolution

### ➤ "Brisque Impose" functionality

- Create fully imposed signatures
  - All pages at the correct orientation and positioning
  - All marks, color bars, and sluglines
  - Complete integrity with original layout
  - Additional text of your choice in the slugline
- Upgrade Mac PSM Rip to full Brisque Impose capability
- 1 bit TIFF to any 3rd party CTP/CTF connectivity
  - Conventional, Stochastic and Hybrid screening
  - Calibration, linearization, compression

### ➤ "Bi-Directional" functionality

- Rip, Trap and Create Brisque ".job" pages from PS/PDF/eps
- Offline Imposition station to the Brisque
- Upgrades Brisque workflows at lower cost with more functionality

### Brisque "Plus" functionality on a PC box

- Extend the life of your Brisque system
- Uses inexpensive standard hardware
- Low cost entry and updates
- Non proprietary platform and software

### "Vector" PDF Capability

- Universally acceptable font-free PDF from a Brisque
- Security ensured by exact conversion of Brisque raster to SmartMove Vectored PDF
- PDF/X compliance to replace TIFF/IT for distribution
- Full Spot Color support
- Fully trapped PDF from your trapped Brisque job
- Highly optimized for small size - superior to PDF2GO
- Watermark support

### ➤ Seamless Interface to your Brisque

- No software installed on your Brisque
- No warranty problems
- Simple network hot folder interface
- Reduces your service and support costs

### ➤ Not just for Brisque

- Investment in Brisq2GO is not limited to your Brisque
- Brisq2GO upgrades to a fully independent SmartMove workflow
- Input:- PS/PDF/eps
- Process:- RIP, Impose, Trap & Manipulate
- Output:- Contone for Proof & 1Bit screened TIFF for CTP/CTF from the same RIPed data (ROOM)

## ➤ Supported Input formats (some at extra cost)

PDF  
PostScript/eps  
Screened 1Bit TIFF  
JDF (Imposition)  
TIFF/IT  
Brisque Page .job (ct/lw, nct/nlw, .assg)  
Brisque Impo .job (ct/lw, nct/nlw, .assg)  
Heidelberg Delta List  
+ other Legacy systems

## ➤ Supported Output formats (some at extra cost)

Vectorized font-free PDF  
Vectorized font-free PostScript/eps  
Vectorized font-free DCS  
Vectorized font-free SmartPDF  
Screened 1Bit TIFF  
(Conventional/Stochastic & Hybrid)  
TIFF/IT  
Brisque .job (nct/nlw, .assg)  
Heidelberg Delta List  
Presstek DI  
Soft Proof formats (Contone TIFF & GMG etc)  
Fuji Final Proof  
+ other Legacy systems

## ➤ Optional Extras

Decision tools  
Ink re-mapping  
Page Manipulation  
(splice, rotate, re-res etc)  
Rich Black  
Label tools  
Watermark  
Trap  
JDF Imposition with SMposer  
Hi-res Viewer (zoom to 25,000%)  
Comprehensive Job Browser with  
dynamically re-sizeable Thumbnails

### System requirements

#### Basic system:

Intel Pentium P4 2.8GHz Dual Core  
512MB RAM  
Storage - 160GB or greater

#### Recommended system:

Intel Pentium P4 3.2GHz Dual Core  
1GB RAM  
Storage - 320GB or greater

OS: W2K Professional, W2K Server, W2K3 Server, XP Professional

Brisq2GO converts your Brisque into a PDF workflow extending the return on your existing investment.

Brisq2GO is a future proof investment which can be upgraded to a full SmartMove workflow system working totally independently of the Brisque.
